**How NCARB & NYSED can help you reach**  
**your career goals**

**Learn more about the licensure process, and find**  
**valuable resources.**

The Architectural Experience Program® (AXP®) provides a framework to guide you through gaining and recording your professional experience. Developed by NCARB, the program is required by most U.S. jurisdictions and is a key step on the path to earning a license. Through the AXP®, you'll learn how to safely and competently handle the scenarios you'll face as an architect. With broad experience areas that reflect the current phases of practice, the program prepares you for everything from site design to project management.

The Architectural Experience Program® (AXP®) is an essential step in the path to becoming an architect. Through the AXP®, you will learn about the daily realities of architectural practice, acquire comprehensive experience in basic practice areas, explore specialized areas of practice, develop professional judgment, and refine your career goals. The AXP® is developed and administered by the National Council of Architectural Registration Boards (NCARB). In most jurisdictions, completion of the AXP® is a requirement for initial registration (licensure). The AXP® identifies the tasks that are essential for competent practice. The program is structured to prepare you to practice architecture independently upon initial registration.
