

# 1ST FLOOR COLONNADE FOUNDATION BUILDING

Areas marked in red should remain clear.

# 1ST FLOOR COLONNADE

## FOUNDATION BUILDING

### General Guidelines

- Wall structures or projection screens must be hung at least 18in below ceiling
- The window benches and globe light fixtures may not be removed.
- No drilling or anchoring to the floor.
- A minimum 4ft clearance must be maintained in a direct path from the south entrance of the colonnade to the north exit door. This includes a minimum head clearance of 7ft.
- Materials may not be adhered to the exterior side of colonnade windows.
- The east glass wall of the colonnade is shared with the library. To avoid blocking the majority of daylight into the library, art installations on the glass should not obscure more than 50% of the wall.
