HARRISON MILNE ME'17

MICHAEL CAPONE ME'17

BRIDGET BISSELL ME'17

ADVISOR:

PROF. GEORGE DELAGRAMMATIKAS

Each year, a team of undergraduate students at the Cooper Union work together to design, build and test a racecar for a competition sponsored by the Society of Automotive Engineers. The competition includes assessments of the vehicle's design, reliability, performance and cost. As a team based out of New York City, vehicle testing and driver training are the team's toughest challenges. This year, the team focused on improving the vehicle's ease of use for inexperienced drivers, which included an aerodynamic package, smaller wheels and more predictable suspension and engine characteristics.
