STEEL BRIDGE

The Steel Bridge Competition, organized by the American Society of Civil Engineers (ASCE) and the American Institute of Steel Construction (AISC), challenges students to quickly assemble an 18-ft steel bridge on-site, scoring how much it weighs, how much it deflects under the applied load, and how quickly it's built.

Cooper Union's Steel Bridge Team has placed at the regional competition for the last four years in a row, with 1st place finishes in 2016 and 2017. The 2015 and 2018 bridges placed third.
