# ART TRADING PLATFORM ON BLOCKCHAIN

We implemented an Artwork Trading Platform on a blockchain. With this project, we attempted to solve the problem of digital copyright of artworks. Blockchain provides trust for the participants as it keeps all the transactions in a distributed ledger. The platform can keep a clear history of trading related to an artwork to help tell what is legal and what is not. It will be a good start of the simplification of protecting copyright and a practical approach of digital artwork trading.
